

**REMARKS**

Claims 1-25 were present for examination in the above identified application. Claims 12-17 have been allowed. Claim 4, which depends directly from claim 1, is objected to and would be allowable if rewritten in independent form including all limitations. The remaining claims 1-3, 5-11 and 18-25 stand rejected under 35 U.S.C. 103(a) as unpatentable over U.S. Patent 6,650,248 to O'Donnell et al. in view of PCT Publication WO94/28675 to Seymour et al.

Claim 1 has been amended to include all limitations of claim 4 and accordingly represents claim 4 written in independent form. Claim 4 has been cancelled. Amended claim 1 is asserted to be allowable for the reasons stated by the Examiner in the Office Action regarding claim 4. Further claims 2, 3 and 5-11 which depend from amended claim 1 are asserted to be allowable due to their dependence on claim 1.

Claims 12-17 stand allowed.

Claim 18 has been amended to recite that the audible questions are asked regarding the radio frequency of transmission of the transmitter and that the means for identifying, identifies a radio frequency and that the transmitter is set to the identified radio frequency. No such audible questioning, determination or setting of a transmitter regarding a radio frequency is taught or suggested by the references or their combination. Accordingly, claim 18 is asserted to be allowable and claims 19-25 are asserted to be allowable due to their dependence on claim 18.

The Commissioner is hereby authorized to charge any additional fees which may be required in this Application to Deposit Account No. 06-1135.

Respectfully requested,

FITCH, EVEN, TABIN & FLANNERY
